

IPE wood price list

Profile	Description	Available Lengths	Starting Price \$/LIN.FT	Availability	Notes
	5/4x6 Deck Board. Grooved to be installed with Ipe clips. This is the most popular profile for Ipe decking. Easy to install and no visible fasteners. This thickness allows joist installation up to 24" o.c. and the cupping is minimal.	3', 4', 5', 6' and 8' to 20' in even lengths	4.99 \$	Over 10,000 linear feet	Shorter lengths cost less per linear foot. 20' and 16' lengths are at a premium price per linear foot. FSC Ipe available in this profile.
	5/4x6 solid edge board. These are used for the perimeter of the deck (where groove will not work) and for deck fascias.	5x4x6' - 20'	7.00 \$	Over 4,000 linear feet	Typically available in lengths from 8' to 20'. FSC Ipe available in this profile.
	1x4 solid profile is used for fences and privacy screens	1x4x8' - 20'	4.00 \$	Over 10,000 linear feet	Popular item, available in 8' to 20', shorter lengths are lower priced per linear foot.
	1x6 Ipe solid is used for fencing and privacy screens as well as the deck skirt	1x6x8' - 20'	6.50 \$	Over 10,000 linear feet	Available in even lengths from 8' to 20'.
	1x6 grooved Ipe boards is an option for decking. Installed with Ipe clips	1x6x8' - 20' -GR	6.50 \$	Over 10,000 linear feet	This item is a cheaper alternative to 5/4x6 decking. Make sure decking is well ventilated and there won't be material cupping. Best not to install on decks that are low to the ground.
	1x6 tongue and groove (T & G) Ipe decking installed for porch flooring and fencing.	1x6x8' - 20' T&G	6.29 \$	Over 2,000 linear feet	Square profile, milled from 1x6 Ipe. Installed with stainless steel trim screws. Available in lengths 8' to 20'.
	Ipe Siding - Ipe profile. Used for house siding, shed siding and other Ipe siding applications	5/4x6x8' -20'	8.29 \$	Over 4,000 linear feet	This siding is installed quickly with Ipe clips and no visible fasteners. There is a nice 1/2" reveal, but no background material is shown through the reveal. Milled from 5/4x6 Ipe.
	2x4 profile is used for Ipe framing, Ipe screens and fences as well as Ipe railings and handrails.	2x4x8' - 20'	6.25 \$	Over 4,000 linear feet	This profile is available in even lengths from 8' to 20'.
	24" x 24" Ipe balcony Tile. These tiles are used to cover concrete floors. Installed with Ipe pedestals and Bison pedestals.	Ipe Tile 24"x24'	46 \$ pc	Over 300 pcs	Tiles are installed on rooftop Ipe deck applications. Allows for easy removal for roof access and quick installation on plastic pedestals.
	1x8 Ipe fascia Profile	1x8x8' - 20'	7.80 \$	Over 8,000 linear feet	This profile is available in even lengths from 8' to 20. Typically used as step risers and fascias.
	2x6. Heavy Duty Deck Floors, Pergolas	2x6x8' - 20'	10.99 \$	Over 6,000 linear feet	This profile is available in even lengths from 8' to 20'. Use stainless fasteners when framing or building pergolas. Use plugs when necessary.
	2x8. Pergolas, Structures, Deck Framing.	2x8x8' - 20'	15.99 \$	Over 4,000 linear feet	This profile is available in even lengths from 8' to 20'. Used for framing and heavy duty step risers, fascias and pergolas.
	2x10. Fascias, Cladding Posts-Columns	2x10x8' - 20'	19.99 \$	Over 2,000 linear feet	This profile is available in even lengths from 8' to 20'. Used for framing and top rails.
	2x12. Fascias, Cladding Posts-Columns	2x12x8' - 20'	28.98 \$	Over 2,000 linear feet	This profile is available in even lengths from 8' to 20'. Used for framing, pergolas and fascia.
	1x10. Fascias, Cladding Posts-Columns	1x10x12	15.00 \$	Over 2,000 linear feet	This profile is available in even lengths from 8' to 20'. Used for fascias. Stain all sides to prevent cupping, make sure it is properly ventilated.
